MILITARY AND LAW ENFORCEMENT

ARE YOU LOOKING FOR WORLD RENOWNED CYBER TRAINING?

Advanced security solutions by top industry subject matter experts.

Information Warfare Center provides specialized cyber security and forensics training (and services) ranging from mobile forensics to system exploitation. We also cover the defensive aspects of cyber threats.

We are now offering a 10% discount to those in the armed services and emergency services to say thank you for your services. Along with this, we are also offering a couple more discounts for 2015.

** Buy two online classes and get the third free! Mention offer "online thirds" to the sales team for the discount.*

** Fill up a class and get yours for free! If you can find enough people in your area to host a class, we will give you the course ware/test voucher/materials and class for **FREE!***

The forensic classes cover items such as physical data recovery, data carving, reverse engineering, network traffic capture, social media investigations, system memory analysis, mobile device forensics, and more.

The ethical hacking classes cover open source intel gathering, vulnerability analysis, system exploitation, mobile phone hacking, wireless man-in-the-middle attacks, OWASP top 10 web based testing and more.

Don't settle for mediocre or average training, you deserve top level training at a great price.
